

BLACK ACTIVISTS MONTH

5 GENDER
EQUALITY

The **International Vegetarian Day** as well as the **World Food Day** give us an opportunity to talk about the importance of reducing meat intake as well as to tackle food waste.

The **World Habitat Day**, **World Animal Day** and **World Migratory Bird Day** are beautifully connected to understand the importance of animal habitats, and how they are at risks due to human activity.

During **Recycling/Circular Economy Week** you can explore how the life cycle of products can be extended by sharing, leasing, reusing, repairing, refurbishing and recycling existing materials and products for as long as possible.

From environmental justice advocates to scientists and social entrepreneurs, here are just a handful of the many **Black environmentalists** who have contributed to our global understanding of the need to look after our planet.

World City Day give us the opportunity to have an optimistic vision of the cities of the future. Can children imagine a happy and green human habitat?

Mon	Tue	Wed	Thu	Fri	Sat	Sun
2 International Vegetarian Day 	3 World Habitat Day 	4 World Animal Day 	5 Non disposable cup day 	6	7 Unblocktober 	8
